

Durability Defined - The MTB Series of trailers are designed from the ground up to withstand the rigors and demands of daily use on the job. For starters, all models have 16" on-center sidewall members for superior strength and rigidity. The 3/4" thick Engineered Wood floor provides years of service, and never complains. See the Specifications section inside for more details and information.

Size and Selection - The MTB Series is available in either a steel frame or aluminum frame. Sizes range from a 7' x 8' single axle model all the way up to a 8.5' wide x 53' long 5th wheel (or gooseneck) model. Axles range from a single 3,000 lb. axle to triple 8,000 lb. axles. There are literally hundreds of combinations to choose from. If you're not sure, see your dealer for expert guidance and help.

Options for Everyone - Your options can be as simple as a ramp door, roof vent and D-rings for fastening down your cargo. You can also add built in lighting, electrical outlets, a generator, heating and/or air conditioning, cabinets, bathrooms, partition walls, extra height, flooring options, extra doors, windows, aluminum wheels and more.
